

Armoured Shelters

- For protected deployable workspaces
- Built-in ballistic protection
- Ideally suited for military and police

DEW has designed, developed, and tested its new DEW Armoured Shelters to address the critical protection vulnerabilities that exist with the deployable workspaces of militaries and police services. The armour is built in as an integral part of the shelter structure making the DEW Armoured Shelter lighter weight than competing add-on armour solutions. The armour panels are modular and replaceable.

DEW Armoured Shelters protect against ballistic threats from small arms weapons typically carried by soldiers, insurgents and criminals, as well as small fragments such as grenade shrapnel and flying debris. Protection levels are available using NIJ or STANAG 4569/AEP 55 standards. Each DEW Armoured Shelter is a mission system kit providing protection to Land, Air and Naval forces, as well as Police services.

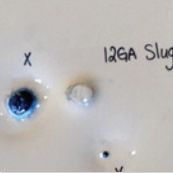

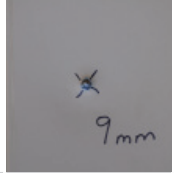

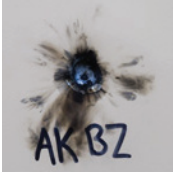

AVAILABLE SYSTEM MISSION KITS

- Ambulance
- Command Post
- Field Office
- Communications
- Tactical Emergency Response Team
- Welding Mobile Repair Team
- Vehicle Mobile Repair Team
- Weapons Mobile Repair Team
- Aircraft Mobile Repair
- Electro-Optronic Mobile Repair
- Meteorological
- Map Reproduction

Each shelter can be tailored to meet customer requirements for size, shape, functionality and method of employment.

VEHICLE	10'	20'
		
Shelter Weight 1575 kgs	Shelter Weight 2050kgs	Shelter Weight 3850 kgs

SUCCESSFULLY TESTED AGAINST

	12 gauge shotgun slug		7.62x63mm APM2 (.30-06)		9x19mm (Luger)		7.62 x39mm API BZ (AK)
	12 gauge shotgun buckshot		7.62mm x 54R Ball LPS		7.62x51mm NATO ball M80 (308)		5.56x45mm NATO Ball M855
